PriWO refrigeration valves

*Precise and reliable
control for industrial
applications*

PriWO

High-quality solutions for refrigeration technology

PriWO refrigeration valves based on the Wolfgang Offenwanger principle – compact, efficient, low-noise, powerful, durable! The amended F-Gas regulation continuously restricts the use of fluorinated refrigerants. The new valves in our PriWO family are our response to this.

Advantages of our PriWO refrigeration valves

 Small and compact

 High switching frequency

 Durable

 Low noise

 Efficient

 Easy to service

CO₂ valve

Our contribution to the utilisation of CO₂ in refrigeration and air conditioning technology

A small component with a big impact! Switches high pressures up to 130 bar with minimal power consumption (6 W solenoid) and is available with either a screwed-on solder sleeve or solder tube.

Our contribution to climate protection

Scan QR code and download data sheet

MicroCool

Our dwarf with huge performance

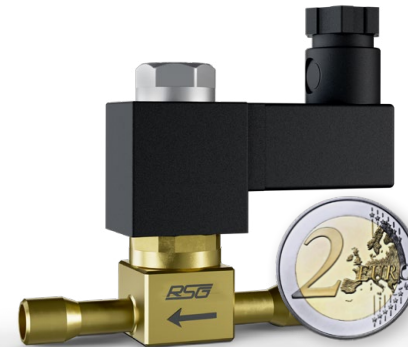

Our MicroCool fits into even the smallest appliances and devices – and is impressively powerful and efficient.

Power consumption **2.5 W**

Pressure up to **30 bar**

Big effect

Small component

Scan QR code and download data sheet

Our modular system for PriWO refrigeration systems

**Six sizes, determined by the seat
diameter of the valve body:**

from DN3 (for Micro Cool only) to DN25

Feel free!

Order as it suits you:

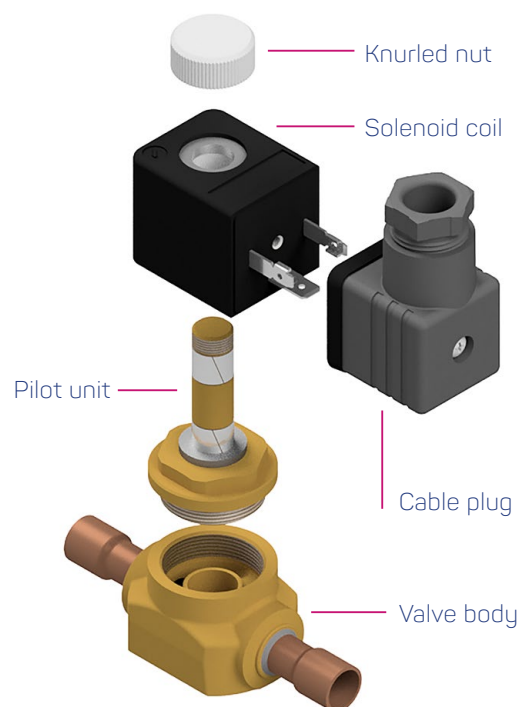

- Assembly kit (includes all components)
- Assembled valves
- Individual components

Available versions:

2/2-way servo valves

- In NC or NO version
(except CO₂ and MicroCool valve)
- Large selection of connection
voltages

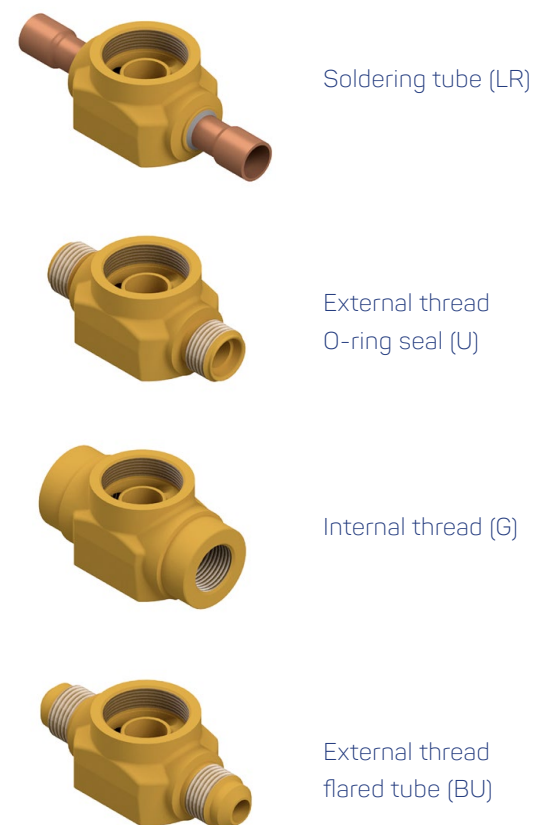

Proven flexibility thanks to the
modular design of our valves:

All components can also be ordered individually!

So you only buy what you really need.

Valve bodies with connection
variants «à la carte»

Refrigeration valves made in Germany

RSG stands for quality and innovation in valve technology. We set standards in the industry by offering customized solutions and first-class products.

Our valve technology is used in numerous applications worldwide and impresses with maximum reliability and durability. Let us impress you with the performance and quality of our industrial valves.

*High-quality solenoid valves
since 1985*

*Customized solutions
for your application*
